**Re: Business Proposal: US Pat. No. 9,194,147 “Modular Swimming Pool”**

Dear \_\_\_\_\_:

I represent Mario Campodonico, the owner of U.S. Patent No. 9,194,147 for a modular pool or spa. Mr. Campodonico and I are interested in discussing a possible business arrangement with you relating to his invention.

Mr. Campodonico’s pool/spa can be set up quickly on a lawn, patio, or deck, or even installed indoors or beneath the ground. Its unique design ensures that seams between adjacent sections are water-tight without requiring a liner. In addition, the modular design enables pool owners who wish to expand or change the shape of their pool to do so easily by adding or exchanging components. A copy of the cover page of the patent is enclosed. In addition, I’ve enclosed a flash drive with an animation showing an updated embodiment of the pool and its components.

Mr. Campodonico and I believe that his invention would be an excellent complement to your company’s product line. If you are interested in discussing a possible business arrangement, which could entail a sale of the patent or a license, please reply by email or call my office. You can also reach me on my cellphone: 626-376-8458.

I look forward to hearing from you.

Sincerely,

John D. Carpenter
